

Manhattan Specification

Designed by Katerina Zachariades

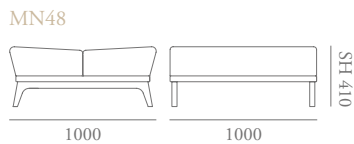

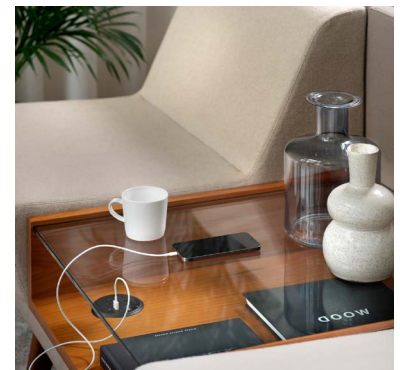

The Manhattan collection is a versatile modular system with clean lines and a contemporary style, with steel or show wood leg detail. A multitude of configurations can be achieved incorporating chairs, sofas, bench seats and seating booths. The system is based on three main elements: seat module, screen and plinth. These create the main assemblies onto which arms, legs and headrests can be added. Ideal as an informal workspace, the high back Manhattan system offers a quiet and discreet place to conduct an informal meeting, catch up on emails, or simply get away from the hustle and bustle. The single work booths feature Aircharge, USB hub and a pivoting laptop table.

Shown as right arm, can be left arm.

Shown as MN3TC but can be left table, or right table MN3TR/L

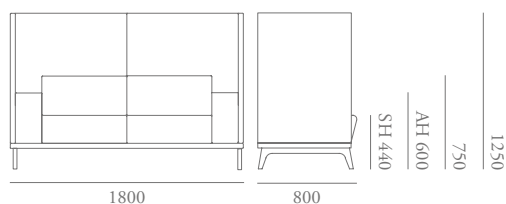

Manhattan Specification

Designed for workplace relaxation, the Manhattan Nap Booth MN23 offers comfort and privacy for a quick nap to help restore and revitalise. Featuring optional fretwork screens, an aircharge® point, a reading light and an adjustable headrest.
